

Description:

Crona Plasteran is an instant ready-to-use cement product for plastering on both red brick and lightweight brick walls, suitable for interior and exterior applications. The plastering result will be smoother and more compact.

Advantages:

- Faster work completion
- Quick setting
- More plasticity during application
- High adhesive strength
- No cracks

Coverage Rate:

40 kg for cover an area of 2m² with a thickness of 2cm.

Storage & Shelf Life:

Crona Plasteran product can be stored for 6-8 months in a dry, well-ventilated place, provided the packaging remains unopened or undamaged.

How-To Application:

- Pour approximately 10 liters of clean water into a container, then slowly add 50 kg of Crona Plasteran powder while stirring continuously until it's fully used. Mix until it becomes even and homogeneous, with no lumps of powder remaining.
- Apply the mixture onto the prepared surface using a trowel or plastering tool. Once the desired thickness is achieved, smooth the surface until it appears even and compact.
